Subject: COVID Compliance, New

Greetings Students,

Happy New Year. This email addresses the COVID-19 vaccine option and the Complio process to be implemented as we approach the Spring semester.

COVID-19 Vaccine

Per the email from Deans Jones and Smith below, nursing students are eligible to obtain the COVID vaccine series. Please be mindful when your other compliance immunizations are due in order to maintain your compliant status. More information can be found on the CDC website regarding [co-administration with other vaccines](#). You can view your approaching expiry dates in Complio by locating column 4 titled "Non-compliance Date" on your health passport (see attachment). As a reminder, always ensure you have an updated health passport behind your Linfield badge.

New Complio Category

An additional Complio category, COVID-19, will appear in your account ready for use approximately January 18. The category is planned to contain three items: Test/Swab, Antibodies, and Vaccines. It will be crucial to continuously update information as it applies to you as assigned clinical sites or experiences may require COVID data. If your site requires data, you will be notified with instructions via email.

Thank you,
Reese
