Subject: UPDATES to on-campus clinical policies

Dear Faculty, Staff, and Students,

I want to commend everyone on the exemplary care you have taken to keep our community safe and prevent COVID infections. We still need to mask, physical distance, and screen ourselves daily for new symptoms, but there are some updates to our COVID policies. I have [attached the Spring21 COVID policy document with changes in yellow highlight](#).

During on-campus clinical experiences in the ELC, we **will not** complete COVID screening with temperature checks. We will continue to use PPE as indicated in the policy.

Below are the updates:

- All students, faculty, and staff will continue to complete the daily health checklist before attending on-campus experiences.
- CLINICAL FACULTY will be responsible to record attendance of students and any additional faculty at on-campus experiences for contact tracing as needed.

Thank you everyone for adhering to the COVID policies and prioritizing safe meeting guidelines so we can continue to learn and grow together.

Sincerely,
Dr. Julie Fitzwater
